Office Action Summary	Application No. 10/525,220	Applicant(s) SHINMURA ET AL.	
	Examiner Teresa J. Walberg	Art Unit 3744	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Funakura et al (JP 2001-336896) in view of Yamauchi et al (JP 2000-081294).

Funakura et al disclose a heat exchanger and method of making including a pair of header tanks, a plurality of heat exchanging tubes disposed between the pair of header tanks and arranged in parallel in a header tank longitudinal direction, each of the header tanks being provided with one or more partitioning walls integrally formed in each of the header tanks and extending in the header tank longitudinal direction, the heat exchanger tubes having a flat configuration and extending between the tanks, the header tanks being integrally formed,

Funakura et al does not disclose partitioning walls extending in a header widthwise direction or holes formed in the longitudinal partition. However, Yamauchi et al disclose providing a heat exchanger header with widthwise partitioning walls and holes formed in longitudinal partition walls to turn the refrigerant and provide multiple passes. It would have been obvious in view of Yamauchi et al to provide partitioning walls extending in a header widthwise direction and holes formed in a longitudinal partition in the heat exchanger

header of Funadura et al, the motivation being to enable turning the refrigerant fluid to extend the length of the flow path and thus increase heat transfer.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Suzumura et al, Joshi, Woodhull et al, Insalaco, Abell et al, Lowenstein et al, and Miura et al are cited to show heat exchanger header structures.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Teresa J. Walberg whose telephone number is 571-272-4790. The examiner can normally be reached on M-F 8:00 - 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on 571-272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
